

+ Premier-Swing – In-head

The Premier-swing In-head utilises an electro-hydraulic operator designed for a wide variety of applications. It is suitable for almost all types of external and internal swing doors.

Our In-head swing operator is just as suitable for disabled access, nursing homes and hospital corridors – where the requirements are for flexible operation, reliability and high density traffic conditions. The operator has been developed to cope with tough conditions. The motor operates quietly and is completely silent during the hold open time. The door can be held permanently open by using a programme selector.

The electronics and the motor are discreetly housed in an In-head enclosure.

KEY FEATURES

- + Only 165mm of housing hold all of the automatic equipment
- + No unsightly arms
- + Compact unit
- + Can be used to replace existing “In-head” swing systems
- + Built in “break-out”

DOOR FUNCTIONS
